

BloxOne[®] Threat Defense Advanced

Strengthen and optimize your security posture from the foundation

THE NEED FOR FOUNDATIONAL SECURITY AT SCALE

The traditional security model is inadequate in today's world of digital transformations.

- The perimeter has shifted, and your users directly access cloud-based applications from everywhere.
- IoT leads to an explosion of devices that do not accept traditional endpoint technologies for protection.
- Most security systems are complex and do not easily scale to the level needed to protect these dynamic environments.

What organizations need is a scalable, simple and automated security solution that protects the entire network without the need to deploy or manage additional infrastructure.

INFOBLOX PROVIDES A SCALABLE PLATFORM THAT MAXIMIZES YOUR EXISTING THREAT DEFENSE INVESTMENT

Infoblox BloxOne Threat Defense Advanced, a comprehensive DNS Detection and Response (DNSDR) solution, detects threat activity that other solutions miss and stops attacks before they occur with hunted, pre-campaign DNS threat intelligence to disrupt attacker supply chains. Intelligent ecosystem integrations and automation reduce manual effort, while Infoblox's unique AI-driven analytics focus analysts on what matters most and provide insights that reduce MTTR, raise the ROI of existing security tools, and elevate overall SecOps efficiency.

KEY CAPABILITIES

- Detect and block exploits, phishing, ransomware and other modern malware that other solutions miss
- Protect users and devices, regardless of platform or OS, at the DNS layer, including BYOD, IoT, and ICS
- Discover high-risk applications and manage your Shadow IT, Insider, Compliance and other risks
- Prevent data exfiltration techniques with machine learning/ AI analytics, including DNS-based data exfiltration, DGA, and DNSMessenger
- Restrict user access to inappropriate or unwanted web content and track activity
- Protect your brand with Lookalike Domain Monitoring for your most valuable internet properties
- Accelerate investigations 3X and streamline threat response and threat-hunting activities
- Enhance visibility: Get precise visibility "and rich network context" by integrating with IPAM asset metadata for optimum event understanding and correlation
- SOC Insights lets you jump-start investigation and response on the threats that matter most and reduce MTTR with AI-Driven Insights

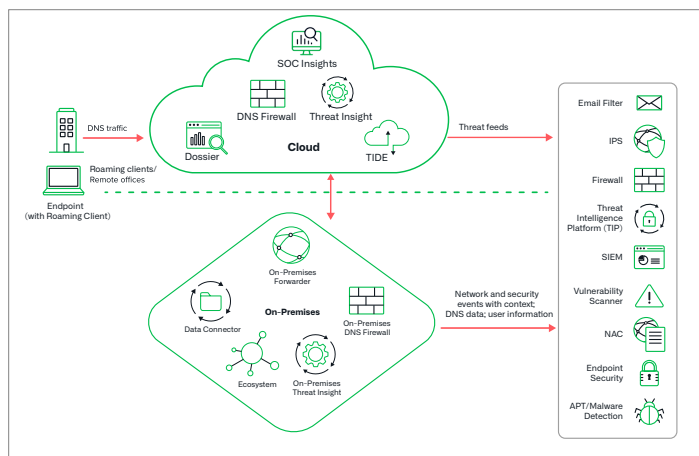

Figure 1: Infoblox hybrid architecture enables protection everywhere and deployment anywhere

MAXIMIZE SECURITY OPERATION CENTER EFFICIENCY

Reduce Incident Response Time

- Automatically block malicious activity and provide the threat data to the rest of your security ecosystem for investigation, quarantine and remediation
- Optimize your SOAR solution using contextual network and threat intelligence data, and Infoblox ecosystem integrations (a critical enabler of SOAR)-reduce threat response time and OPEX
- Use Infoblox SOC Insights capabilities to know which events matter most with the AI-driven analytics that go beyond simple malware risk-ranked dashboards

Unify Security Policy with Threat Intel Portability

- Collect and manage threat intelligence data from internal and external sources and distribute it to existing security systems
- Reduce cost of threat feeds while improving effectiveness of threat intel across entire security stack

Faster Threat Investigation and Hunting

- Jump-start investigation and response on the threats that matter most and reduce MTTR with AI-driven insights that go beyond simple malware risk-ranked dashboards
- Makes your threat analysts team **3x more productive** by empowering security analysts with automated threat investigation, insights into related threats and additional research perspectives from expert cyber sources to make quick, accurate decisions on threats

“ In this day and age there is way too much ransomware, spyware, and adware coming in over links opened by Internet users. The Infoblox cloud security solution helps block users from redirects that take them to bad sites, keeps machines from becoming infected, and keeps users safer.”

Senior System Administrator and
Network Engineer,
City University of Seattle

Figure 2: BloxOne Threat Defense integrates with the entire cybersecurity ecosystem

HYBRID APPROACH PROTECTS WHEREVER YOU ARE DEPLOYED

Analytics in the Cloud

- Leverage greater processing capabilities of the cloud to detect a wider range of threats, including data exfiltration, domain generation algorithm (DGA), fast flux, fileless malware, Dictionary DGA and more using machine learning-based analytics
- Detect threats in the cloud and enforce anywhere to protect HQ, datacenter, remote offices or roaming devices

Threat Intelligence Scaling

- Apply comprehensive intelligence from Infoblox research and third-party providers to enforce policies on-premises or in the cloud and automatically distribute it to the rest of the security infrastructure
- Apply more threat intelligence in the cloud without huge investments into more security appliances for every site

Powerful integrations with your security ecosystem

- Enables full integration with on-premises Infoblox and third-party security technologies, enabling network-wide remediation and improving the ROI of those technologies

Remote survivability/resiliency

- If there is ever a disruption in your Internet connectivity, the on-premises Infoblox can continue to secure the network

THE ROI OF INFOBLOX SECURITY

Offload strained security devices

- Decrease the burden on strained perimeter security devices such as firewalls, IPS, and web proxies by using your already available DNS servers as the first line of defense
- **Up to 60 times reduction in traffic sent to NGFWs***

Improve ROI on existing investments

- Get more value out of adjacent/complementary products by bi-directionally sharing threat and attacker information
- If sending DNS data to SIEM, reduce the cost of SIEM solutions by sending only suspicious DNS data to these platforms

Automation

- Reduce cost of human touch/error using automation
- Overcome lack of skilled resources - 60% less demand on your team to implement (configure in hours instead of months) and operate for both skills and cost
- Make your threat analysts 3x more productive with an easy-to-use, single console for deep threat intelligence

*Based on real customer data

Infoblox unites networking and security to deliver unmatched performance and protection. Trusted by Fortune 100 companies and emerging innovators, we provide real-time visibility and control over who and what connects to your network, so your organization runs faster and stops threats earlier.
